

## 6100 Synergie+ 10W40

### Bodyguard for the engine!

6100 Synergie+ is an engine lubricant with 10W40 viscosity offering the performance and approvals of an engine lubricant with viscosity 5W40.

Standards: ACEA A3/B4 - API SL/CF

MB 229.3

Renault RN0700, RN0710 

VW 502 00 - 505 00

BMW special lubricant  
(gasoline engines up to model year 1998)

Opel without Eco-Flex service

Porsche up to model year 2002

Suzuki

### Technical advantages

#### High synthetic share

- Low vaporization losses, therefore lower oil consumption and perfect wear protection
- High aging resistance for a clean oil circuit and high thermal loads also for supercharged engines
- Viscosity 10W40 clearly reduces wear-induced oil consumption and noises in vehicles with high mileage compared to engine lubricant with viscosity 5W40.
- Viscosity 10W40 protects from oil dilution caused by unburned fuel and thus from unnecessary wear – important for short-distance motorists.
- Vehicles with these approvals and specifications have been on the market already since 1996.

as of 10/2011
